

## **Sharon L. Roble, MD, FACC**

Dr. Roble was born and raised in the Midwest and attended Michigan State University for both her undergraduate and medical school training. She completed her Internal Medicine and Pediatrics residency training at The Ohio State University and Nationwide Children's Hospital, then spent one year at The Rainbow Babies and Children's Hospital for her Pediatric Cardiology training before completing her cardiology fellowship and advanced imaging fellowships at The University Hospitals in Cleveland, Ohio. She was proud to return to Columbus as a faculty member at The Ohio State University and Nationwide Children's Hospital from 2009-2016. During that time, she was an integral member of the Adult Congenital Heart team facilitating the growth of the high-risk pregnancy cardiovascular program. In 2016, she joined the staff at OhioHealth establishing the Adult Congenital Heart Disease clinic including high risk pregnancy clinic and assisted in the development of the advanced imaging (cardiac CT/MRI program) at the OhioHealth Mansfield campus. Dr Roble holds many certifications including board-certified in cardiology and adult congenital cardiology, advanced certification in cardiovascular imaging including echocardiography, cardiac nuclear imaging, and cardiac CT. Dr Roble shares her home life with her spouse who is a pediatrician and her two children.
